

Crime and Anti-Social Behaviour statistics for the Kents Hill & Monkston Parish

Quarter 1 - 2010

This report shows the first three months of 2010 Crime and Anti-Social Behaviour statistics for the Kents Hill & Monkston Parish. It has been compiled from the Community Safety Mapping website and analysed to reflect only those communities within our parish boundaries. This report is prepared quarterly - and will be posted on the Parish Council website .

The main reason for this report is to provide key information and there will also be a summary in the NAG section of iNFACT.

However, it is very important that such information is made available to the Parish Council; to highlight any adverse trends; and to use as a vehicle to initiate actions that may be necessary. It is fair to say that - when compared statistically - our Parish looks reasonably good but that there is clear room for improvements. It is hoped that the Parish Council will be proactive and fully support all efforts to enhance our future profile. In two months we have had , potentially, over 100 unhappy residents and to them there is no such thing as 'low-level' crime. Amongst all the numbers / statistics this figure should be the most important to the Parish Council and the NAG.

<u>In summary for this Parish :-</u>	<u>Actuals Qtr.1 2010</u>			<u>Main Categories</u>
	<u>Crime</u>	<u>ASB</u>	<u>Total</u>	
Brinklow	7		7	
Kents Hill	29	20	49	Neighbours / Rowdiness, etc / Theft from Vehicle/ other Vehicle Related Crime
Kingston	63	5	68	Shoplifting / Assault & Intimidation / Theft from Vehicle
Monkston	45	15	60	Criminal Damage / Domestic Abuse / Neighbours / Rowdiness, etc / Theft from Vehicle / Vehicle Theft
Monkston Park	18	23	41	Domestic Abuse / Neighbours / Rowdiness, etc / Environmental Crime / Theft from Vehicle / Vehicle Theft
<u>Total Parish</u>	<u>162</u>	<u>63</u>	<u>225</u>	

Note: Anti-Social Behaviour in Monkston Park above the average for the Milton Keynes region
Vehicle (Crime and Anti-Social Behaviour categories) across Parish above the average for the region

The main features of the SaferMK Community Safety Mapping site are:

It is a web-based mapping system allowing Neighbourhood and Area (estate, village or town) level analysis of crime and anti-social behaviour, using data obtained from [Thames Valley Police](#), the [Milton Keynes Council](#) and [Buckinghamshire Fire & Rescue Service](#).

The SaferMK Community Safety Mapping site defaults to calculating the legend banding by incidents 'Per 1,000 Population' as this gives a more accurate overview. The 'Population' figure is the population of the Area, Neighbourhood or the entire borough. These are sourced from the National Census and updated through estimates provided by the Office for National Statistics.

For Areas with smaller populations, especially in the rural parts of the borough, the crime or anti-social behaviour rates may appear high sometimes when viewed in 'Per 1000' mode. However, this is primarily due to the low population within these areas so you should select 'Absolute' to view the actual number of incidents.

What factors affect Crime and Anti-Social Behaviour figures?

Residents should not be alarmed if their area appears to have a high level of crime, it simply means that there are more reported crimes than the average for Milton Keynes - this could be for a number of reasons, such as a police operation running in the area. Likewise, levels of anti-social behaviour (ASB) vary throughout the year. Another factor is that quite often a small minority of individuals are responsible for the majority of incidents over a given time period. This will cause a spike in the figures until the offenders are apprehended and/or action taken against them. Times of financial hardship are a contributory factor in crime figures and during the current recession there has been an increase in crime across the country. Milton Keynes has been affected by this, although it isn't as bad as seen in a lot of other towns and cities.

Putting the Data into Perspective

Where a Neighbourhood or Area is shown as High or Above Average for a particular category it doesn't mean there is a persistent problem and referring to the past 12 months of data may be relevant. This is particularly so where there has been a small number, or even a single incident of a less-common crime or ASB type - such as Serious Violence.

ASB Tolerance Levels

Whenever you experience anti-social behaviour you should report it. But residents will have differing tolerance levels and some areas of Milton Keynes may have residents who are more aware of anti-social behaviour issues and are therefore more likely/willing to report it.
