

Paper Concerning Agenda Item FC 179/23 Provision of CCTV

Following several reports of vandalism/ anti social behaviour in Kent's Hill and potentially Walnut Tree the PC is looking at starting a CCTV service to act as a deterrent and or identify perpetrators.

Telephone conversations have been held with 2 potential suppliers about a potential trial and service.

WCCTV

Made an initial approach to the Clerk in January. Based in Lancashire they provide CCTV to different sectors of industry and local authorities.

They can supply a mobile CCTV camera as a free of charge trial for a month . If PC wished to proceed after that the device would have to be purchased by the PC (no price has been provided to date). The company representative said they could potentially undertake any fitting of the camera to another location for an additional charge but this has not been provided to date. The PC would take any evidence etc found on the CCTV to the police. As such they do not really provide a managed service.

Crimewave

Made a presentation to the PC in 2023. They provide a managed service to other local MK PC's. CCTV camera can be provided for a free of charge trial at a location of our choosing. For a managed service charge would be £7,800 pa Ex VAT and moves or ££5,800 pa Ex VAT and moves. The charge to move the camera is to increase potentially to

£225 Ex VAT each but the company are in discussions with MKCC to lower that to c£150 Ex VAT. Crimewave have provided a draft agreement.

There are other potential suppliers in the market and these would require further investigation into their capabilities.

It is recommended PC proceeds with free FOC trial with both suppliers and during the trial period runs an invitation to quote with these 2 and at least one other supplier to select a final provider.

Decision Required:

1. It is recommended that a FOC trial is undertaken using Crimewave and WCCTV in Kent's Hill and another location to be agreed.
2. Invitation to Quote is undertaken to select a final supplier
